

# ATECH FLASH TECHNOLOGY

# KIOSK READER EX-S5C

## USB 3.1 Gen 1

## 5.25" Serviceable Reader

### Quick, Reliable

Photo Kiosk Systems are getting more and more popular due to the high growth of digital photography. As a result of this, kiosks in high commercial or industrial usages require their components to be serviced more frequently due to the increase in wear and tear. Ease of serviceability is the key to decreasing down time for the kiosk owner.

Also Smart Devices are getting more and more popular than using traditional point shoot cameras. As a result of this, consumers are more likely to print their pictures from their Smart phones or tablets. Since there are many different types of connectors for these devices, it is hard for the kiosk builder to support them all.

Atech Flash Technology (AFT), one of the fastest growing digital kiosk card reader manufacturers has addressed these issues and is offering a Serviceable digital media kiosk reader with Smart Cable solution. The EX-S5C has all the functions of a multi-card reader, but its main strength is its serviceability. It comes with a key specially designed to eject and remove the serviceable module to replace the reader or smart cables. Replacing or updating the EX-S5C kiosk reader unit only takes a few minutes versus an hour or more using conventional card readers.

To keep things simple, the EX-S5C is based on the traditional 5.25" drive bay size so you can add this to your existing USB enabled PC system or Kiosk System. Utilizing the latest USB 3.1 Gen 1 technology, it is the best solution for high performance, reliability and value. This will also ensure that compatibility or upgradeability with existing kiosks or PC systems.

EX-S5C has many great features that utilize today's latest technologies

- USB 3.1 Gen 1 specifications
- Tough Braided Smart Cables for iOS and USB-C Mobile devices
- Extractable front cartridge for easy service
- 4 card slots to support the latest media cards
- Pin-Protected CompactFlash socket design
- USB-A for legacy USB Drives
- USB-C for new and future USB Drives
- Front USB Ports are Read/Write
- Write-Block or Read/Write card slot function with on-board switch
- Color Silkscreen for easy ID of media card slots
- Supports the latest high capacity cards like SDHC, SDXC and UDMA
- Built-in USB hub for expandability (i.e. adding Bluetooth or WiFi)
- Fits into standard 5.25" drive bay
