1. Locate SERVICE KEY, make sure that the word TOP are visible and the HOOKS are facing upwards.

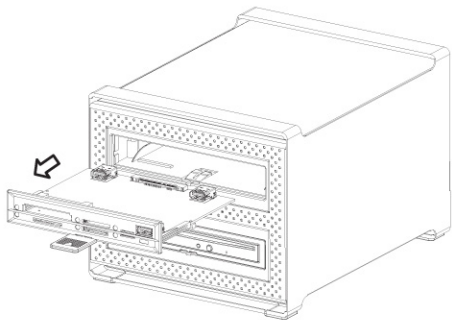

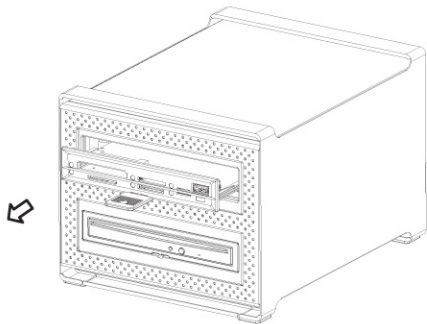

****EX-S5 installed in MK-5 unit****

2. INSERT Service Key into key slot located under the MS card slot.

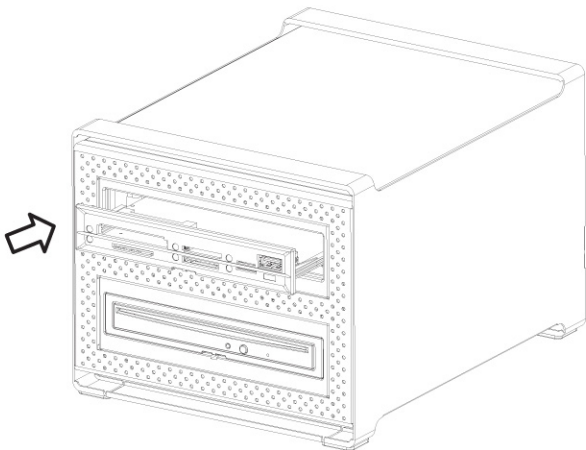

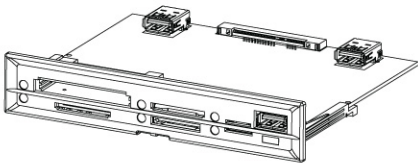

PUSH Service Key into slot until you feel it has CLICKED onto the Bezel/PCB.

3. PULL the Service Key to REMOVE the Reader Module from main housing.

4. After removing the OLD Reader Module, INSERT NEW Reader Module into Chassis of EX-S5 until it CLICKS/LOCKS into place.

5. Once new Bezel/PCB is installed into EX-S5 Chassis, you can POWER-UP your system and use the new EX-S5 Reader.
